in the tech industry
after only 12 weeks

✓ Growing network
of international
companies

✓ Sustainability
Officer certifica-
tion included

Greenbootcamps

brings you together with jobs that offer real opportunities!

We see a shortage of skilled workers in many industrialized countries. At the same time, we have highly qualified university graduates who are unable to find employment. Digitization of the working world is our key! With our offer we help to provide the existing competence in the right places and to place future employees.

The topic of climate protection and sustainability plays a decisive role for us. The provision of sustainable resources is our claim!

In doing so, we pay attention to the needs of the employees on our planet. Everyone should be able to reconcile their personal needs in private and professional life.

We look forward to you!

Thorsten Leich

Founder & CEO

Julia Nadolny

Founder & Business Development

In just 12 weeks... ... to the new job in one of our partner companies!

Are you a graduate of a university or technical college?
Would you like to live in the country where you studied and work for international employers abroad?
Then apply for our bootcamps! We will find the right job with a future for you!
Our coaches are always at your side.

Advantages

- ✓ Your future in tech in just 12 weeks
- ✓ Cooperation with the Goethe-Institut: German courses can be booked at a special price
- ✓ Refund of the seminar fee if you cannot find a job after the course
- ✓ Networking with growing companies on an international level
- ✓ Certification as a sustainability officer is included

Greenbootcamps as a career booster in digital competence!

In our boot camps you will learn everything you need to find a permanent position as a data analyst, data scientist or data engineer in an international company. Of course, this also allows you to work as a freelancer.

In addition to technical skills, we also coach you in the area of communication. Knowledge of German significantly improves your chances of applying if you want to work for German, Swiss or Austrian companies.

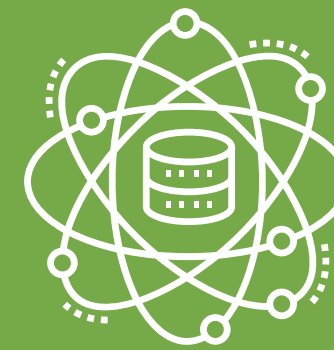

The demand for data specialists is growing steady and fast!

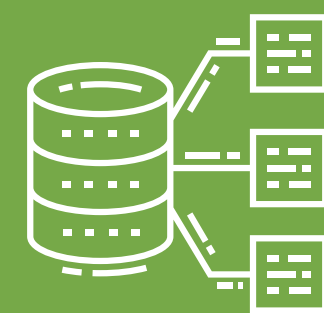

Data Analyst

A data analyst analyzes and evaluates existing data sets to create new knowledge that is important for companies. If you manage the balancing act between commercial interests and technical-analytical solutions, you are well prepared for this competitive job market. In this boot camp you will receive exactly the analytical skills that lead to the solution of individual problems.

Data Scientist

A data scientist brings together different data sources and examines the information collected. In this way, he establishes new relationships and gains business-enhancing insights for his company. In our boot camp, we give you the tools and methods to convert complex data into relevant information and to provide companies with prepared solutions.

Data Engineer

A data engineer deals with the collection, processing and verification of data. This boot camp course forms the basis for analysis projects in the data science environment and big data management.

How do I apply for a bootcamp and what is the best way to get funding?

Application

We value diversity and welcome applications from all over the world – regardless of gender, nationality, ethnic and social background, religion and belief, as well as disability, age, sexual orientation and identity. We look forward to hearing from you through the channels below.

Funding/Grant

We work with a network of companies that have a great need for graduates of our boot camps. They are interested in hiring newly qualified graduates as trainees or junior consultants and will pay some or all the seminar fees.

Prepayment

If you pay for your boot camp in full in advance, you will receive an 8 % discount on the seminar fee. If the seminar ends prematurely, only the pro rata fee will be charged and the difference will be refunded – within the framework of the notice periods granted.

Installments

We also offer you to pay for the boot camp in three monthly installments. The first installment up to a week before the start, the second installment halfway through and the last installment after the end of the boot camp.

Contact

Do you need any more information?
We are looking forward to your contact!
